

# **Bulkstrain**

## High Quality Strainer

**Bulkstrain** is a high quality ductile iron basket strainer, it must be installed to the pipeline system to protect equipments (ie. flowmeter or pump) from unwanted debris. With its unique design, stainless steel mesh inside, high flowrate, epoxy coating, resist from corrosion for long term use. It is widely used in cold and hot water up to 90°C system , air conditioning system, boiler, raw water etc to ensure water clarity and prevent equipment from get clogged and extend the equipment life.

- High Quality Strainer
  - Size : 50-300mm
  - High Flowrate
  - High Grade Epoxy Coating
  - Stainless Steel Mesh Inside
  - Cold and Hot Water up to 90°C
  - Easy Installation
  - Warranty 2 Year
